OBJECTIVE

Aspiring software engineer with a strong foundation in computer science and a passion for artificial intelligence and computer vision. Aims to advance studies in artificial intelligence. Eager to contribute to cutting-edge research and enhance expertise in AI.

PUBLICATIONS

Basharat, M. A., **Riaz, M. M.**, Abideen, Z. U., Noor, N., & Zar, S. (2025). Enhancing organizational efficiency: A cloud-based automation solution. International Journal of Computer Science and Mobile Computing, 14(1), 69–77.

EDUCATION

Bachelor of Science in Computer Science	March 2021-March 2025
Pir Mehr Ali Shah Arid Agriculture University, Rawalpindi, Pakistan	

FSc Pre-Engineering	August 2018 - July 2020
Kips G-9 Markaz, Islamabad, Pakistan	

WORK EXPERIENCE

Gravitas Technology

Associate Developer	May 2025 - Present
----------------------------	---------------------------

- Gained hands-on experience in full-stack development and coding practices.
- Assisted in application development, deployment, and basic DevOps workflows.
- Collaborated with team members on software development and maintenance tasks.
- Collaborated with teams to implement new features and improve app performance.

CorTechSols Pvt. Ltd.

AI / ML Intern	December 2024 - February 2025
-----------------------	--------------------------------------

- Gained hands-on experience in the field of Artificial Intelligence.
- Acquired valuable skills and knowledge through teamwork.
- Contributed to learning and development opportunities.

PROJECTS

Project Management & AI Insights Platform Full-Stack Web Application

Description: Developed a next.js 14 project management application with react, typescript, and tailwind css frontend, integrated google gemini ai for task analysis and insights. used postgresql via supabase for data persistence with role-based access control and n8n email automation. manages projects, tasks, deliverables, and issues with real-time tracking, activity logging, and comprehensive team communication management.

VQA with Scene Awareness

Description: Built a React Native assistive application for visually impaired users using VQA, combining YOLOv8-based object/person detection, person recognition, and NLP-driven voice interaction to deliver real-time audio feedback through a fully hands-free, accessibility-optimized interface, with a Flask-based backend handling AI inference and request processing.

AI Chatbot with Vector Embeddings & Gemini API

Description: A Python-based chatbot using Google Gemini for NLP and Qdrant for vector-based knowledge storage. It classifies user input, retrieves relevant answers using Sentence Transformers, and dynamically expands its knowledge base. The chatbot ensures intelligent query handling with real-time response generation.

CERTIFICATIONS AND TRAINING

ComputerVision andMachineLearningTraining

- Institution: BIIT
- Date Completed: 27 September 2024
- Details: Completed an in-depth training program covering computer vision algorithms, Flask,machine learning models, and their applications in software development.

Additional Certificates DLD Competition

- Institution: BIIT
- Date Completed: 7 June 2022
- Designed and developed robotic car showcased at the exhibition.
- Implemented control systems and integrated sensors for autonomous navigation, receiving positive feedback for innovation.

Programming Event Organizer

- Event: BIIT Programming competition
- Date: June 7, 2024
- Role and Responsibilities: Organized and coordinated logistics, participant registrations. Managed on-site operations, ensuring smooth execution and resolving issues promptly.

LANGUAGES

- English: Fluent
- Urdu: Native

TECHNICAL & DEVELOPMENT SKILLS

- Machine Learning
- Computer Vision
- Natural Language Processing
- React Native
- React JS
- Django
- Rag
- Next Js
- N8N

SOFT SKILLS

- Creative Problem-Solving
- Active Listener
